Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections –35 USC § 112

Claims 3-5 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 3-5, “their basic position” lacks proper antecedent basis.

Claim Rejections – 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,8,10 and 11 are rejected under 35 U.S.C. § 102(b) as being anticipated by U.S. patent 5,076,623. See bodies 1 and 9 which are locked via locking elements 4 that are moved into and out of locking engagement by way of magnetic key 11.

Claims 1-8,10 and 11 are rejected under 35 U.S.C. § 102(b) as being anticipated by U.S. patent 5,645,302 to Horimoto. See figs. 22-32 which illustrates the present invention with bodies 110 and 120 which are locked via locking elements 130 that are moved into and out of locking engagement by way of magnetic key 161. As shown in fig. 22 the locking elements are interrupted ring segments and are biased into position via spring element 162.

Claims 1-5,8,10 and 11 are rejected under 35 U.S.C. § 102(b) as being anticipated by U.S. patent 3,837,525 to Kobayashi. See figs. 4-7 which illustrates the present invention with bodies 1 and 10 which are locked via locking elements 9,9' that are moved into and out of locking engagement by way of magnetic key 3. As shown in figs. 4 and 6 the locking elements are biased into position via spring element 6,6'.

Claims 1-5,8,9 and 11 are rejected under 35 U.S.C. § 102(b) as being anticipated by Japanese patent 4-331895. See figs. 1 and 3 which illustrates the present invention with bodies 13 and 14 which are locked via locking elements 24 that are moved into and out of locking engagement by way of electromagnetic key

32. As shown in fig. 1 the locking elements are biased into position via the spring element 29.

Claims 1-4,8,10 and 11 are rejected under 35 U.S.C. § 102(b) as being anticipated by U.S. patent 4,260,180 to Halushka et al. See fig. 3a,3b and 4 which illustrates the present invention with bodies 21 and 31 which are locked via locking element 34 that is moved into and out of locking engagement by way of magnetic key 38.
